

# St. Catherine of Siena Academy

To Whom It May Concern:

We would like to introduce you to the SCA Constellations. We are an all-girls, high school robotics team from St. Catherine of Siena Academy in Wixom, Michigan. We are part of FIRST (For Inspiration and Recognition of Science and Technology) Robotics Competition, and this is our fourth season.

We are one of the few all-girls teams in the state of Michigan, where there are more than 550 teams. As women are underrepresented in the STEM fields, the founding of the SCA Constellations places these women in a pathway for success in STEM fields. As a robotics team, the ladies are responsible for all aspects of the design, build, programming, and business processes needed to complete the task that FIRST places before them each year.

SCA is an all-girls school founded in 2010. Our educational policy is based on intellectual, spiritual, leadership, and sisterhood cornerstones. As we are a small and young school our team needs support from outside the SCA family to operate successfully. Though we are now established in the FRC world, and we have some experience under our belts, we still need assistance and donations in the way of tools/equipment, raw materials, time and expertise from mentors and financial support to cover the tremendous cost of competing as an FRC team.

FRC is the highest level of the FIRST Robotics Program. The mission of FIRST is to inspire young people to be science and technology leaders and innovators, by engaging them in exciting mentor-based programs that build science, engineering, and technologies proficiencies. This organization fosters well-rounded skills like communication, leadership, self-confidence and problem-solving, which are things the women of the SCA Constellations strive for every day.

Please see the attached form for more information. Thank you for your interest in the SCA Constellations! We look forward to welcoming you as a mentor or sponsor.

Sincerely,

*Katie Brandt*
